

The NEW Oxygen Barrier Film
with 9 Layers for the best
protection of your silage

150µm Beige/Black Anti UV

High resistant multilayers film Anti UV
with oxygen barrier (EVOH).

80µm Beige/Black Anti UV

Multilayers film and Anti-UV with oxygen barrier (EVOH).
Very light and high resistant, it is very easy to place it.
We suggest the use of a mechanical hurts protection net.

Underlay 45µm

Multilayers film with oxygen barrier (EVOH). The film can be
placed as underlayer of normal PE film or in alternative combined
with a plastic net with closed texture.

Wall Film 110µm

Specific film that guarantees a optimal protection of
the silage wall and the sides bunker .

The Oxygen Barrier Film that protects your silage.
